SUBJECT INDEX

Aeration, in towers, 499
Affinity chromatography, 895
Agitation, Waldhof, 1697
Alcaligenes faecalis, in continuous and mixed culture, 167
Alcohol production, bacterial, 1375
Amylase, immobilized, 153
  production, effect of CO_2, 1109
Amyloglycosidase, immobilized, 1323
Anaerobic digestion, solid wastes, 1119
Animal cells (see Cell Culture)
Aspartic acid, production of, 1797
Bacillus stearothermophilus, alcohol production by, 1375
Bacillus subtilis, amylase production by, 1109
Bioelectrical chemical cell, *S. cerevisae*, 1529
Biological waste treatment, with microbial protein recovery, 1639
Biotransformation of drugs, 785
Brevibacterium sp., microbial protein production by, 1749
Candida boidinii, growth of, 1717
Candida tropicalis, growth of, 1705
Catalase, immobilized, 285
Cell culture, 625, 695, 733, 1847
  equipment for, 659, 1847
  large-scale facility for, 659
  media for, 745, 765
  suspension, 629, 659, 713, 1335, 1467
  synchrony in, 675, 703
Cell disintegration, by rapid decompression, 1545
  mechanism of, 465, 845
Cell, immobilized, bacteria, 1729, 1797
  yeast, 481
Cellulase, production, continuous, 1
  from straw, 361
  in mixed cultures, 1291
Cellulose, hydrolysis, kinetics of, 873, 1421
  waste, microbial protein production from, 327, 361, 1749
Centrifuge, batch, containment of, 1313
Chromatography, affinity, 895
Citric acid production, from carob sugars, 1373
  from sugar cane bagasse, 291
  precipitation from mash, 1363
Colpidium campylum, in continuous and mixed culture, 167
Continuous cultivation, *Alcaligenes faecalis*, 167
  amylase production in, 1109
  apparatus for, 985
  Colpidium campylum, 167
  models for, 375
  Thiobacillus ferrooxidans, 31
  variable volume, 1805
Cyanide, bacterial detoxification, 457
Dehydrogenases, immobilized, 51
Diffusion, in immobilized enzymes, 423, 441, 1515, 1555
Drugs, microbial biotransformations of, 785
Enzymatic processes, in nonaqueous media, 815, 1101
  solid substrates, 185, 1421
Enzyme kinetics, 99, 433, 441, 1455, 1551
Enzyme production, 1, 129, 143, 1839
  continuous, 1, 1109
Enzymes, immobilized, 107, 153, 203, 315, 413, 445, 451, 585, 1237, 1617, 1783
  kinetics of, 211, 423, 441, 1157, 1237, 1435, 1515, 1555
  preparation of, 85, 119, 253, 285, 295, 315, 455, 599, 617, 1019, 1323, 1369, 1435, 1571, 1617, 1679, 1695
  reactors for, 51, 99, 515, 585, 613, 827, 1029, 1379, 1401, 1555, 1729
  stabilization of, 1391
Escherichia coli, growth of, 227
  immobilized, 1797

Fermentation processes, gas exchange in, 1663
Fermentors, bench-scale, 227, 1839
continuous, 277
film, 1245
pilot plant, 1349
valves for, 277, 1827
Foam breaker, mechanical, 273
Fungus, submerged cultivation of, 1183
Galactosidase, immobilized, 617, 1571
kinetics of, 1157, 1455
Gas exchange, in fermentation processes, 1663
Gluconobacter melanogenus, sorbose conversion by, 349, 1473
Glucose oxidase, immobilized, 285, 413
Gramicidin S synthetase, production of, 129, 143
Growth, kinetics, 227, 271, 279, 399, 461, 1705
measurement of, 461, 621
yields on methanol and methane, 15
Hepatic microsomal oxidase, immobilized, 107
Hydrocarbon fermentations, 241, 541, 1697
Hydrocarbons, microbial growth on, 241, 1705
Immunoadsorption, for enzyme purification, 607
Inhibition, substrate and product, 943, 965, 1599, 1761
Invertase, immobilized, 1679
Ion exchange membranes, 1387
2-Keto-L-gluonic acid, biosynthesis and metabolism of, 1485
Kinetics, biological processes, 167, 557, 571, 1051, 1065, 1269
enzyme, 299, 873, 1421, 1455, 1551, 1627
immobilized enzymes, 211, 1029, 1157, 1515, 1555
microbial growth, 271, 279, 399, 461, 779, 915, 943, 965, 1199, 1301, 1591
of antibiotic synthesis, 925
of mixed cultures, 1065, 1211
phenol degradation, 1211
substrate inhibition, 943, 965, 1599
Lactase, immobilized, 315, 1695
Lactic acid fermentation of whey, 997
Lactose, in whey, hydrolysis of, 1571
Lipase, immobilized, 1401
Liquid membranes, cell encapsulation in, 1137
Mass transfer, coiled tubes, 1383
in immobilized cells, 1729
in immobilized enzyme reactors, 1515, 1555
Media, for cell culture, 745, 765
optimization of, 1833
Membranes, ion exchange, 1387
ultrafiltration, 445, 1365
Methane, growth of microorganisms on, 15
Methanol, growth of microorganisms on, 15
Microbial processes, batch, 271, 779, 925, 1591
cyclic, 779
nutrient supply control, 1829
Microbial protein production, from waste cellulose, 327, 361, 1749
from waste waters, 1639
in mixed cultures, 1291
photosynthetic bacteria, 1561
Microorganisms, patent protection of, 1853
Milk, continuous enzymatic coagulation, 585
Mixed cultures, cellulase and protein production by, 1291
kinetics of, 1065, 1211
oxygen transfer to, 499
predator-prey relationships, 167, 1269
Models, continuous cultivation, 375
microbial growth, 271, 399, 1301
predator-prey, 167, 1269
NAD, electrochemical regeneration, 515
recycling in enzyme reactors, 51
Nocardia sp., cholesterol transformation by, 815
Optimization, nutrient media, 1833
Oxygen, dissolved, in streams, 69
polarographic probe response, 527
Oxygen absorption, in fermentation broth, 1083
in towers, 499
Oxygen equivalence of microbial cells, 859

Oxygen uptake, measurement of, 69
Patents, 1853
Pectin esterase, immobilized, 85
Phenol degradation, by *Pseudomonas putia*, 1599
by pure and mixed cultures, 1211
Phosphotase, acid, immobilized, 1365
Phytolacca americana, production of plant virus inhibitor by, 1335
Placental alkaline phosphate, purification of, 607
Plant virus inhibitor, production of, 1335
Plasmin inhibitory substance, production of, 305
Polysaccharides, enzymatic degradation of, 433
Potato haulm, protein from, 1775
Protease, immobilized, 1019, 1783
Protein, extraction from potato haulm, 1775
Protein hydrolysis, enzymatic, 451
Pseudomonas putida, phenol degradation by, 1599
Reactors, for enzymatic processes, 51, 99, 515, 613, 1379
for microbial processes, 227, 277, 481, 499, 1245, 1349, 1729, 1797
Rennet, bacterial, production of, 1349
Saccharomyces cerevisiae, bioelectrochemical cell, 1529
disintegration of, 845
Scopolia japonica, production of plasmin inhibitory substance by, 305
Single-cell protein (see Microbial Protein)
Sorbose, microbial conversion to sorbosone, 349, 1473
Sorbosone, production from sorbose, 349, 1473
Starch conversion, enzymatic, 153
Steroid conversion, enzymatic, 1101
Sucrose inversion, by immobilized yeast, 481
by invertase, 827
Thiobacillus ferrooxidans, continuous cultivation on zinc sulfide, 31
determination of cell numbers and cell size, 621
Trichoderma viride, cellulase and protein production by, 1, 361, 1291
cellulose hydrolysis by, 873
growth kinetics of, 1199
Trypsin, immobilized, 455
Ultrafiltration membranes, 455, 1365
Urate oxidase, immobilized, 1435
Valves, for continuous fermentors, 277
for glass vessels, 1827
Wastes, agricultural, fermentation by yeast, 1823
solid, anaerobic digestion of, 1119
Whey, lactic acid fermentation of, 997
wine fermentation of, 1443
Wine fermentation, of whey, 1443
Wood, microbial protein production from, 1749
Yeast, disintegration of, 845
fermentation of wastes, 1823
growth kinetics, 943, 965
immobilized, 481
protein production by, 1291
Yeast production, control of nutrient supply in, 1829
Zinc sulfide, cultivation of *Thiobacillus ferrooxidans* on, 31

ACKNOWLEDGMENT

The Editor and the Editorial Board gratefully acknowledge the contributions of the following reviewers during the past year:

Statement of ownership, management, and circulation (Act of August 12, 1970; Section, 3685 Title 39, United States Code)

1. Title of Publication: Biotechnology and Bioengineering
2. Date of filing: September 25, 1975
3. Frequency of issue: Monthly
3A. Annual subscription price: $95.00
4. Location of known office of publication: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016.
5. Location of the headquarters or general business offices of the publisher: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016
6. Names and addresses of publisher, editor, and managing editor:
Publisher: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016
Editor: Elmer L. Gaden, Jr., Dean's Office, University of Vermont, Burlington, Vermont 05401
Managing Editor: None
7. Owner: John Wiley and Sons, Inc., 605 Third Avenue, New York, New York 10016
The following is a list of stockholders owning or holding 1% or more of John Wiley & Sons, Inc., stock as of September 11, 1975.
Cynthia W. Darby, Box 651, Bridgehampton, New York 11932; Hamilton Darby, Box 651, Bridgehampton, New York 11932; Edward P. Hamilton, 605 Third Avenue, New York, New York 10016; W. Bradford Wiley & Francis Lobdell, Trustees, Elizabeth W. Hamilton Trust, 605 Third Avenue, New York, New York 10016; Edward P. Hamilton, Trustee under will of Elizabeth Wiley Hamilton, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; I. M. Kolthoff, University of Minnesota, School of Chemistry, Minneapolis, Minnesota; Eric S. Proskauer & Charles H. Lieb, Trustees, u/a by Jenny R. Proskauer, 220 Central Park South, New York, New York 10019; Francis Lobdell & W. Bradford Wiley, Trustees, f/b/o Deborah Elizabeth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016; Cynthia W. Darby & Julia Gilbert, Trustees, under will of Kate R. Q. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; Francis Lobdell & W. Bradford Wiley, Trustees, f/b/o Peter Booth Wiley, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016; Francis Lobdell & W. Bradford Wiley, Trustees, f/b/o William Bradford Wiley II, c/o John Wiley & Sons, Inc., New York, New York 10016; Edward P. Hamilton & Cynthia Wiley Darby, Trustees, under will of William O. Wiley, c/o Gifford, Woody, Carter & Hays, 1 Wall Street, New York, New York 10005; Adele E. Windheim, 8 Dundee Road, Larchmont, New York; W. Bradford Wiley & E. P. Hamilton, Trustees for Edward P. Hamilton Foundation, c/o John Wiley & Sons, Inc., 605 Third Avenue, New York, New York 10016; Mrs. Rosamond R. Pennywitt, 49 Bristol Place, Bay Head, New Jersey 08742; Drexel Burnham & Co., 60 Broad Street, New York, New York; Mass. State Carpenters Fund, Hermitage Bldg., 1 Militia Drive, Lexington, Mass. 02173; Bankers Trust Company, 16 Wall Street, New York, New York 10015; National Bank of Detroit, Woodward Avenue, Detroit, Michigan; Riggs National Bank of Washington, D. C., 1508 H Street, N. W., Washington, D. C.; Manufacturers Hanover Trust Company, 350 Park Avenue, New York, New York 10022; Bank of New York, P. O. Box 11 203, New York, New York 10249; Morgan Guaranty Trust Company, 23 Wall Street, New York, New York 10015; Bradford Trust Company, 95 Wall Street, New York, New York 10005.
8. Known bondholders, mortgages, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities: None
9. For optional completion by publishers mailing at the regular rates (Section 132.121 Postal Service Manual)
39 U.S.C. 3626 provides in pertinent part: "No person who would have been entitled to mail matter under former section 4359 of this title shall mail such matter at the rates provided under this subsection unless he files annually with the Postal Service a written request for permission to mail matter at such rates." In accordance with the provisions of this statute, I hereby request permission to mail the publication named in item 1 at the reduced postage rates presently authorized by 39 U.S.C. 3626.
(Signature and title of editor, publisher, business manager, or owner) Michael Harris, Vice-President
10. Not applicable.
11. Extent and nature of Circulation

	Average no. copies each issue during preceding 12 months	Actual number of copies of single issue published nearest to filing date
A. Total no. copies printed (*Net Press Run*)	1850	1850
B. Paid circulation		
1. Sales through dealers and carriers, street vendors and counter sales	—	—
2. Mail subscriptions	1474	1474
C. Total paid circulation	1474	1474
D. Free distribution by mail, carrier or other means		
1. Samples, complimentary, and other free copies	28	28
E. Total distribution (*sum of C and D*)	1502	1502
F. Copies not distributed		
1. Office use, left-over, unaccounted, spoiled after printing	348	348
2. Returns from News agents	—	—
G. Total (*sum of E & F—should equal net press run shown in A*)	1850	1850

I certify that the statements made by me above are correct and complete.

(*Signature of editor, publisher, business manager, or owner*) MICHAEL HARRIS
